

**TIMELESS DESIGNS.**  
WORLD-CLASS PERFORMANCE.  
**SPARKLING FINISH.**  
LONG-LASTING DURABILITY.

# Ravishing

finishes perfectly paired  
with optimal functionality.

AQCETO – Watertec's homegrown brand – enables the ultimate modern living experience. Put together by an elite panel of world-class designers, architects and engineers, every product reflects the brand ethos and is crafted to perfection. AQCETO brass faucets are exceptionally rich in finish and quality, and technologically engineered to live up to the most exacting performance standards.

Every product is designed to offer supreme functionality. At the very core of an AQCETO faucet is its internal cartridge. Each cartridge is tested for over half a million cycles to ensure fail-safe operations of the spindle and a long, trouble-free everyday operating life.

AQCETO products give new meaning and expression to finish and durability. Its range of faucets come in a stunning range of chrome and PVD finishes that are eye-catching. The high plating thickness provides extreme tolerance to both climate and water conditions and a 96+ hours salt spray test ensures the finishes are highly durable and last longer. All these attributes put together make AQCETO products blend in with classic as well as contemporary architecture of urban homes.

## Innovation is in Watertec's DNA!

At Watertec, we have always believed in the power of innovation. It drives technological advancement, leading to quantum leaps that contribute to functionality and durability.

Our dedicated team of experts are tasked with developing diverse product ranges that are innovative both in form and function. Products that are aesthetically pleasing, are easy to install and maintain, and minimize environmental impact are delivered under strict quality control.

### High-quality aerators for high-performance

Watertec uses world-class German Aerators that are integrated with a honeycomb structure. This protects the faucet against lime build-up and ensures soft water flow.

### Cartridges that add the wow factor

The world's best cartridges manufactured by a leading European Company are used which provides comfortable, flawless and smooth operation.

### Listen to the whisper of the water

Our dedicated team of engineers and designers craft products that conduct the effortless flow of water whilst eliciting zero irritating noise of water hammering.

### Dazzling surfaces making you look twice

Latest plating technology gives products an aesthetic, elegant look. This mirror shiny surface gives a rich appearance and acts like a protective layer against corrosion & poor water quality too.

### Blending passion with innovation

Our in-house designers work with passion to blend creativity & innovation. They constantly explore latest practices and trending approaches to create new concepts for the future.

### 0% Drip = 100% peace of mind

Every faucet is tested with water and air pressure to ensure that not a single faucet leaves the unit without quality check.

### Care for mother nature

At Watertec, we care for the environment. Our entire team supports and follows eco-friendly, sustainable approaches to save water and energy.

## THE MANUFACTURING PROCESS - How a brass bar becomes a faucet!

### CASTING – Forming the faucet

Let's walk through the journey of the manufacture of a Watertec Faucet – It starts as a raw brass bar which melts in the furnace at over 1000 degrees Celsius. This liquid metal is now ready to be cast into a recognisable form. The faucets are manufactured using IMR gravity casting machine

### MACHINING – Adding smooth finishing

The faucet undergoes Machining - a completely mechanised process. The cutting-edge technology and experienced workforce ensure the gravity casting body has all the surfaces finished to a high degree of smoothness.

## POLISHING – Shimmer & shine

Next, the faucet enters the Polishing stage. The rough casting is polished by hand, to ensure the surface has an impressive shine. All flat surfaces and edges are polished manually. An automatic polishing machine is also used to increase production capacity.

## PLATING – Adding long-lasting layers

The faucets are placed in an electrolytic immersion bath. In one of the most modern plating systems, the faucet now receives a brilliantly shiny chrome layer that ensures long-lasting durability. It is left to bathe in several electrolytic baths for almost an hour.

## ASSEMBLING – Piecing the faucet together

A single faucet comprises almost 30 individual components. In the final assembly, the specialised workers assemble all the parts. No product leaves the factory without first being tested for leaks and optimum spray performance.

## INDUSTRY 4.0 COMPLIANT

Watertec is growing stronger – we're backed by a 1700-strong workforce and a 340-strong on-field sales force. Today, Watertec is one of the biggest manufacturers in India, churning out more than 30 million units of bath fittings alone, every year.

We run state-of-the-art manufacturing units that comply with Industry 4.0 framework. Our latest unit also has best-in-class manufacturing equipment complete with robotics and automated machinery. The management believes that while automation and technology are crucial, a careful balance of skilled staff is a critical part of the production strategy. That's why we take pride in the selection process of our staff.

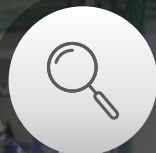

## RESEARCH & DEVELOPMENT

We, at Watertec actively work on finding better ways to delight our customers. Our in-house Research & Development team puts great thought into designing, intricately crafting, and meticulously detailing new products before they go into production. Once an idea for a product is identified, it undergoes several rounds of experimenting, redesigning, and testing until the finished product is ready for the market.

We have a dedicated New Product Development (NPD) unit that's responsible for developing new products and improvising on the existing ones to meet the growing market demands. It typically takes 7 to 9 months for every new product launch or improvisation to undergo the 7-step process of innovation and production.

## The 7-step Process of New Product Innovation and Production

### DISCOVERY

A consumer need is discovered and a viable plan is mapped out to meet it.

### CONCEPT & DESIGN

Studying the feasibility of the concept and enveloping a blueprint of the new product, including detailed electronic, mechanical and software design.

### PROTOTYPE

Building a functional model to assess the aesthetics, ergonomics and assembly.

### TOOLING

Releasing the product design for Tool Development.

### MANUFACTURING

Manufacturing the product for pilot production, functional testing and validation.

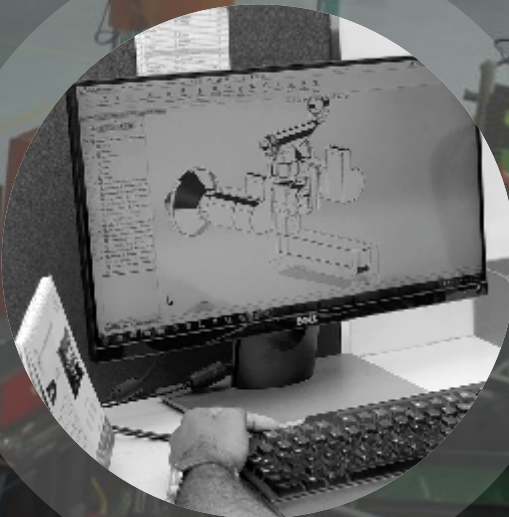

### ASSEMBLY & RELEASE

Assembling and releasing the final product design for mass production.

### DELIVERY

After several rounds of inspection and quality tests and checks, the product is ready for final delivery.

# Stunning

bathroom & plumbing  
solutions, catching  
the world's eye!

Powered by a strong distribution  
& dealer network.

19,000 Channel Partners & Dealers

35 Warehouses & Branches

At Watertec, one of our key strengths is a strong distribution and dealer network. We have built one of the largest and robust PAN-India distribution networks, comprising of 19,000+ channel partners and dealers and 35 warehouses and branches across India. This gives us the confidence to offer a 24-hour delivery policy for our products anywhere in India.

The dedication to delight our consumers has helped us extend our distribution and dealer network in select global markets - UAE, Egypt and several SAARC countries as well as African and Middle Eastern Countries. One continent at a time, Watertec is spreading not just its distribution prowess but also catching the world's eye with its stunning product portfolio.

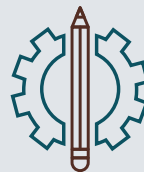

# Design meets

## ENGINEERING

### WATER-SAVING

Aqceto faucets come with Aerated Flow Technology designed to ensure a uniform flow of water, thereby helping save water by up to 70%.

### DESIGN

Aqceto's premium range boasts of a design language that has been meticulously put together by an elite panel of world-class designers, architects and engineers, who have ensured that every product bearing the Aqceto label reflects the brand's ethos and is engineered to perfection.

### QUALITY

At the very core of every Aqceto faucet is its internal cartridge. Each cartridge is tested for over half a million cycles to ensure fail-safe daily operations of the spindle, even under extreme temperatures and pressure conditions.

### WARRANTY

The Aqceto range comes with a 10-year warranty, and ensures that your customers enjoy long-lasting quality without the hassles of incurring periodic repair and replacement costs.

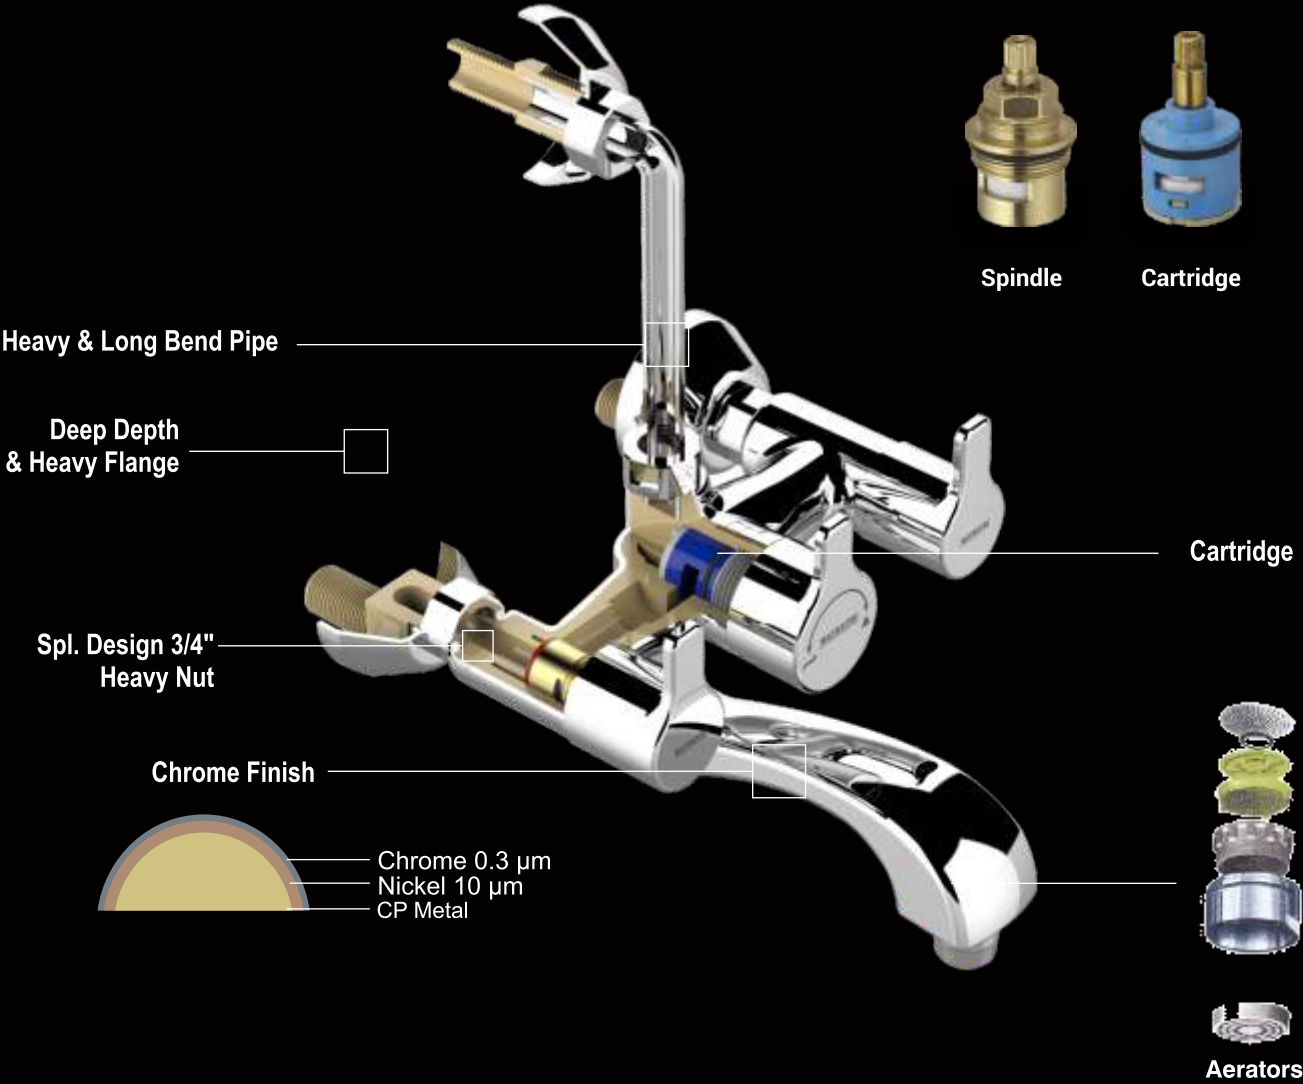

**QUARTER TURN SERIES**

The internal cartridge of all quarter turn series products are fitted with specially designed Italian ceramic disc to ensure soft movement and free flow of water even on normal pressure. Extruded brass rod is used for all metal parts of internal cartridge for flawless performance.

**FAUCET TECHNOLOGY**

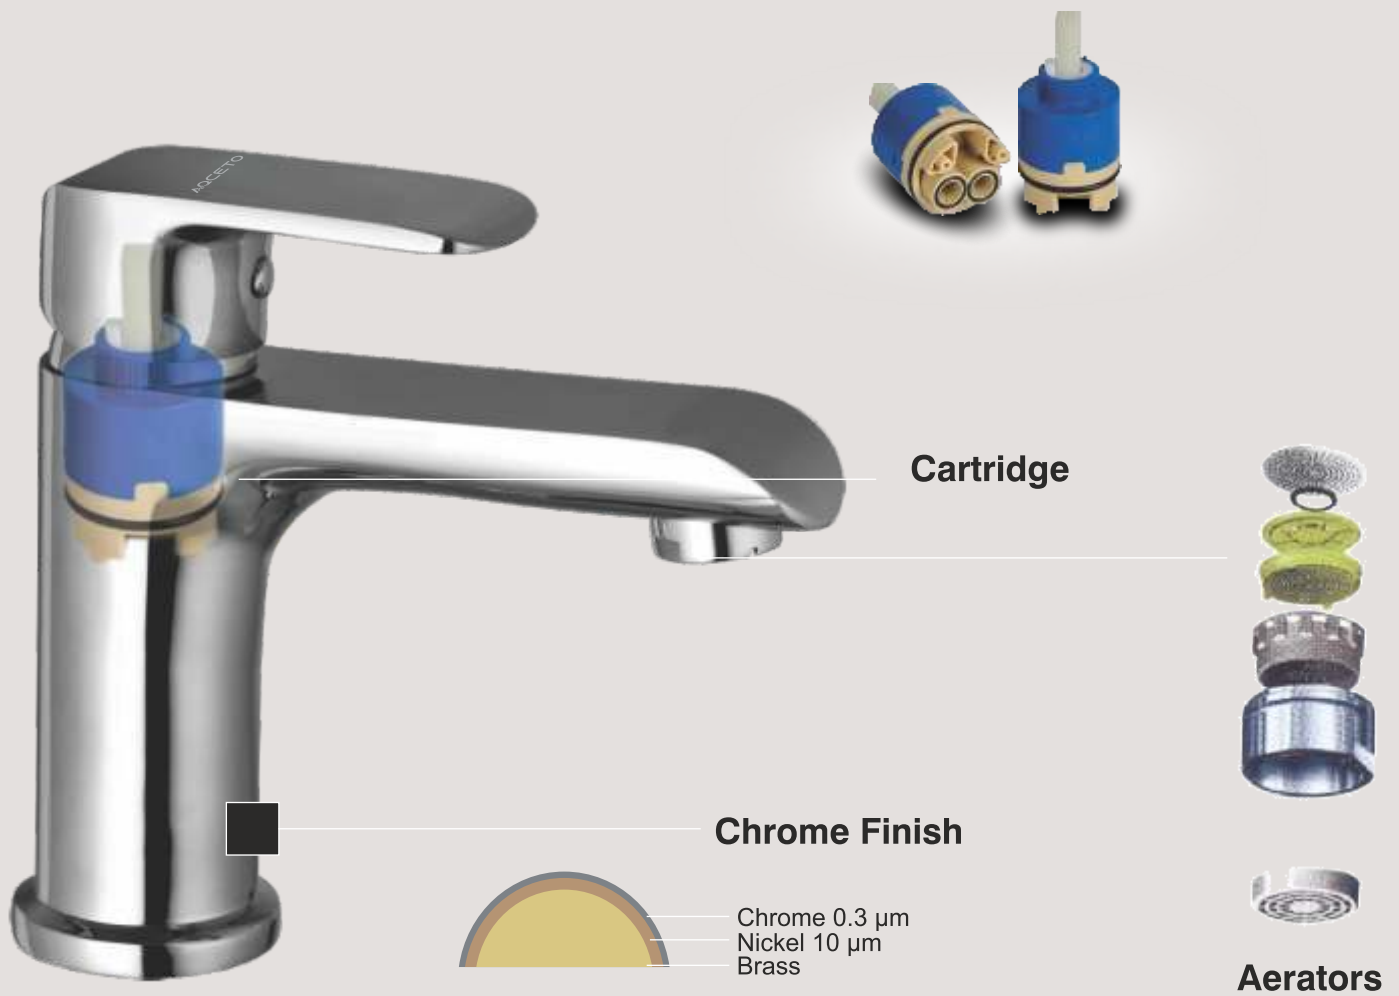

AQCETO

## SINGLE LEVER SERIES

All single lever mixers from Watertec faucets are fitted with specially designed Italian ceramic disc cartridges. A unique flow adjustment feature provided, enables it to perform even at low pressure. This feature is the first and exclusive in the country but comes as a standard arrangement in all Watertec faucets.

Salt Spray Testing	As Per Standard	96 hrs.	<b>WATERTEC</b> Standard 96 - 108 hrs.

## WARRANTY GUIDE

Warranty period will start from date of invoice and shall automatically terminate upon the expiry of the warranty period even if the product has not been installed after purchase or has not been in the use for any part or whole of warranty period for any reason whatsoever.

This warranty is not valid or effective if the products are not installed according to the installation guide. Improper handling of the products automatically terminates and nullifies this warranty, improper care and cleaning will void the warranty.

In the event of any repairs / replacement of any parts of the product, this warranty shall thereafter continue and remain in force only for the unexpired period of the warranty and no extension of the warranty period will be granted. This warranty is only applicable for the manufacturing defects and under no circumstances the manufacturer will be liable for any other defect caused due to indirect, incidental and consequential damages of any kind. This warranty is only effective if the defective product is substantiated with proof of purchase such as invoice copy/warranty card. This warranty remains applicable only if the product has all times been used strictly in accordance with the terms of this warranty and has not been improperly negligently handled.

### CARE AND CLEANING GUIDELINES

Proper care and maintenance will ensure that the product chosen by you gives you years and years of trouble-free service. Clean your faucets only with water or very mild detergent. Wipe clean and polish with a soft clean cloth. Never use acids, strong chemicals, metal polishes or any detergent containing ammonia to clean the faucets.

Special colour and gold plated parts protected with a lacquer coating may deteriorate over a period of time due to mishandling, exposure to atmospheric conditions, extreme climate, pollution in the air, salts and minerals present in the water, exposure to ultra violet rays, moisture, etc. Tarnishing is a natural process and is not a defect. Proper care and maintenance will delay tarnishing and deterioration.

### The warranty does not cover on the following conditions:

- Improper or wrong installation
- Malfunction and damage caused by inappropriate care, wrong usage or modification of products
- Aggressive use of underground water, hard water, dirty water or acid-alkaline contaminated water
- Use with high pressure water ( over 5 Bar )
